COSTA RICA TRIP REPORT

February 10 - 16, 2013

Quetzal/Hummingbird Special!

Leader: Frank Mantlik and local guide

HIGHLIGHTS

(Rarities, specialties, or simply a group favorite):

- Resplendent Quetzal
- Blue-crowned Motmot
- Long-tailed Silky-Flycatcher
- Costa Rican Pygmy-Owl
- Silver-throated Tanager
- Crimson-collared Tanager
- Sunbittern pair
- Mottled Owl
- Fiery-throated Hummingbird
- 240 Bird Species
- 21 species of hummingbirds
- Snowcap
- Buff-fronted Quail-Dove
- Wrenthrush
- Green Kingfisher
- Flame-throated Warbler
- Flame-colored Tanager
- Passerini's Tanager
- Green Ibis
- Squirrel Cuckoo
- 33 Regional Endemics

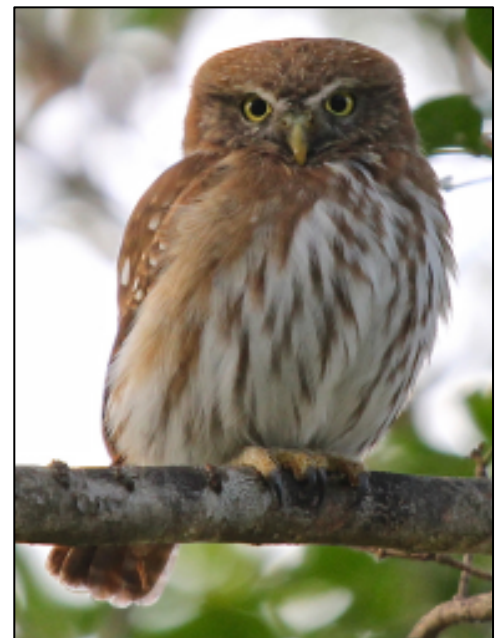

Above, right: **Green Violet-ear**
(All photos by Frank Mantlik)

Day 1 - Arrival San Jose

Today was primarily a travel day, with most people arriving on their flights to San Jose by early afternoon. Following check-in at Hotel Robledal, Frank led a leisurely walk on the hotel grounds. Almost the first bird we saw was a **Ferruginous Pygmy-Owl!** We then saw **Tropical Kingbird, Boat-billed Flycatcher, Rufous-backed Wrens, Hoffmann's Woodpecker, Blue-and-White Swallows, Spot-breasted Oriole, Summer and Blue-gray Tanagers,** and our first **Clay-colored Thrush** (the national bird). This was followed by a delicious dinner at the open-air restaurant, while getting acquainted with each other.

Day 2 - San Jose to Rancho Naturalista

We met Vernon, our local guide, for pre-breakfast birding on the hotel grounds. We saw mostly repeat

species, including the Pygmy-Owl, but added **Little Blue Heron**, **Groove-billed Ani**, and **Streak-backed Oriole**. During breakfast, some saw a **Cinnamon Hummingbird**, a **Grayish Saltator**, and our first **Variiegated Squirrel**. We promptly loaded the roomy van and set off for the Caribbean slope. During the drive, the leaders provided some information about the Costa Rican economy, agriculture, geology, and lifestyle. Off to the left, we could see Volcan Irazu, the highest volcano in the country, which is now dormant. We made a birding stop at Birres hydroelectric reservoir, where we saw flocks of **Blue-winged Teal** and **Lesser Scaup**, a few shorebirds, **Northern** and **Southern Rough-winged Swallows**, **Black Phoebe**, **Palm Tanagers**, **Short-tailed Hawk** (dark morph), **Montezuma Oropendolas**, and **Yellow-faced Grassquits**.

We arrived at Rancho Naturalista (two **Roadside Hawks** along the driveway), checked in, and met for a tasty lunch just meters away from feeding birds including **Passerini's**, **White-lined**, and **Crimson-collared Tanagers**, **Blue-crowned Motmot**, **Black-cheeked Woodpecker**, **Buff-throated Saltator**, **Gray-headed Chachalacas**, **Swainson's Thrush**, **Chestnut-sided** and **Mourning Warblers**, **Black-striped** and **Orange-billed Sparrows**, and **Scarlet-rumped Caciques**. Those who were new to neotropical birding were truly amazed by the incredible avifauna. Up on the balcony, we were at arm's length from an assortment of feeding hummingbirds including **Rufous-tailed Hummingbird**, **White-necked Jacobin**, **Green-breasted Mango**, **Bronze-tailed (Red-footed) Plumeleteer**, **Brown Violetear**, **Green Hermit**, **Violet Sabrewing**, and **(Violet) Crowned Woodnymph**. We also saw **Bicolored Hawk**, **Black-crowned Tityra**, **Bananaquit**, **Rufous-capped**

Warbler, and **Red-throated Ant-Tanager** and a **White-nosed Coati** that came in to snatch a banana. Mid-afternoon we took a bird walk on the grounds, which produced sightings of **Short-billed Pigeons**, **Keel-billed Toucans**, **Crimson-fronted Parakeets**, **Golden-olive Woodpecker**, **Purple-crowned Fairy**, **White-collared Manakin**, **Blackburnian** and **Golden-winged Warblers**, **Tawny-capped Euphonia**, and **Golden-hooded**, **Silver-throated**, and **Bay-headed Tanagers**. Colorful birds, all!

After dinner and reviewing the day's events and sightings, Vernon led those interested on a night walk for nocturnal species. It was quite productive. We heard a calling **Common Potoo**, saw a **Pauraque** on the road, then heard and saw a beautiful **Mottled Owl** at close range. No camera!

Day 3 - Rancho - San Antonio - Casa Turire

We gathered at dawn on the balcony for coffee, and saw **Brown Violetear** and a male **Snowcap**. This uniquely colored hummer appeared as though it had a headlight atop its

head as it foraged on the Vervain (Verbena) flowers. At 6 AM we visited the lighted moth sheet to see what forest birds it would attract. The bonanza included **Plain Antvireo, Dusky-capped, Slaty-capped and Tawny-chested Flycatchers, Cocoa and Spotted Woodcreepers, White-breasted Wood-Wren, Buff-throated Foliage-gleaner, Golden-crowned Warbler**, and a giant gray **Cecropia** moth.

Following a hearty breakfast, we loaded the van for a morning excursion to bird a side road in Platanillo/San Antonio that climbs up Silence Mountain (El Silencio). Birds were plentiful along the riparian and forested slopes: **Variable Seedeaters, White-tipped Dove, Tropical Pewee, Paltry and Torrent Tyrannulets, Emerald and Tawny-crested Tanagers, Tropical Parula, Lesser Greenlet, and Slate-throated Redstart**. At least one **Giant Cowbird** was spotted by Vernon among the active **Chestnut-headed Oropendola** nest colony. Walking back down the road, we saw **Carmioli's (Olive) Tanager, Buff-rumped Warbler, Black-headed Saltator, Social and Gray-capped Flycatchers**, female **White-ruffed Manakin**, and **Black-and-Yellow Tanager**. Ron spotted a **Rufous Mourner** which allowed nice scope views. We heard then had great views of a pair of calling **Sunbitterns** down along the river. Definitely a highlight of the trip! A perched **Broad-winged Hawk** was seen and then Frank got a **Band-tailed Pigeon** in the scope. All were delighted with views of a male **Green Kingfisher** near a bridge, viewed from the van.

Birders at El Silencio

Lunch at Rancho was followed by some down time, though it was easy to continue birding or photographing from the patio and balcony. New species included **Squirrel Cuckoo**. At mid-afternoon we travelled by van for some open-country and wetland birding at Casa Turire. A light sprinkle kept the temperature down. Some **White-crowned Parrots** were seen in a roadside tree, as was a **Roadside Hawk**. Hundreds of swallows on the wires included a **Barn** and three **Mangrove Swallows**. A **White-tailed Kite** perched atop an orange-flowered Poro (*Erythrina*) tree. The area offered a pair of **Southern Lapwings**, **Tropical Mockingbird**, **Great Kiskadees**, **Yellow-bellied Elaenia**, **Eastern Meadowlarks**, **Melodious** and **Red-breasted Blackbirds**. We had lengthy looks at **Gray-crowned Yellowthroat** and **White-throated Flycatcher** and also added **Thick-billed Seed-Finch**, **White-collared Seedeater**, **Black-cowled Oriole**, and a **Yellow-rumped Warbler** to our burgeoning day list. Vernon tried hard to pull a calling **White-throated Crake** out to the roadside with no luck but we later glimpsed a different one in a wet marsh. At the Rio Macho Reservoir behind the Lodge, we saw **Green** and **Great Blue Herons**, more teal and scaup. Heavier rain caused us to abandon birding here. Returning to Rancho, Vernon spotted a **Green Ibis** in a wet ditch, and that spot also produced an immature Purple **Gallinule** and another **Green Kingfisher**.

Day 4 - Rancho - Finca Cristina - Hotel Savegre

During our last morning at Rancho Naturalista, we enjoyed coffee on the balcony and added **Stripe-throated Hermit**, two **Crested Guans**, and **Great Tinamou** (heard), plus clear views of fuming Volcan Turrialba in the distance. After breakfast, three **Collared Aracaris** made an appearance just as we loaded the van. Lisa and Mario were wonderful hosts and the entire smiling staff waved as we drove away. A brief stop at the owner's house and garden resulted in several new trip birds: **Green Thorntail**, **Black-crested Coquette**, **Common Tody-Flycatcher**, and **Streak-headed Woodcreeper**. We spent this travel day birding our way to our next lodge. First stop was Finca Cristina, a family-run shade-grown coffee farm. Ernesto, the owner, gave us a tour of the operation. He and his family work very hard at protecting neotropical migrants and their habitat. Many folks purchased fresh-roasted coffee to take home. A stop at a small farm wetland provided views of **Blue-winged Teal**, **Least Grebe**, **Northern Jacanas**, **Common Gallinules**, and a **Sora**.

After a pit stop outside Cartago (the City of Potatoes), we climbed the Talamanca Mountains, stopping for lunch at a restaurant along the Pan-American Highway. We left the Highway at 9400' elevation to descend to the Savegre River valley and the village of San Gerardo de Dota. As we made our way down, a male **Collared Trogon** appeared on a tree branch over the road. A stop at Miriam's Cafe provided us with a whole new set of birds at her feeders and plantings. **Sooty** and **Mountain Thrushes**, **Rufous-colored Sparrows**, **Flame-colored Tanagers**, **Large-footed** and **Yellow-thighed Finches**, **Volcano**

Hummingbirds, Mountain Elaenia, Long-tailed Silky-Flycatchers, and Sooty-capped Bush-Tanagers were all checked off and photographed. Further downslope, a stop to look for a Quetzal went unrewarded. We checked in to the lovely Hotel Savegre, enjoyed dinner, and reviewed the day's sightings.

Day 5 - Savegre - Los Robles – Catarata Trail

During coffee on the hotel deck on this cool morning, we saw **Slaty Flowerpiercer, Spangle-cheeked Tanager, Yellow-winged Vireo, Collared Redstart, White-throated Mountain-gem, and Red-tailed Hawk**. We took a walk on the grounds in search of **Resplendent Quetzal** and eventually some saw a female fly over the upper cabins. We also saw **Ruddy-capped Nightingale-Thrush, Spot-crowned Woodcreeper, and Rufous-browed Peppershrike**, and heard our first **Costa Rican Pygmy-Owl** tooting. Following a buffet breakfast, Vernon hurriedly summoned us all to an Avocado tree outside Malcolm's room to see a pair of **Resplendent Quetzals!** We all had fabulous scope views before the male eventually took flight with its long streaming tail behind him. High-fives were exchanged for the bird that was the number-one target of everyone on this trip! As a bonus, we saw a tiny, lichen-covered nest with two baby **Scintillant Hummingbirds**.

Later in the morning, four-wheel drive vehicles transported us up a steep mountain road to the end and dropped us off in a magical, mossy, older-growth cloud forest. From here we slowly birded our way back down the Los Robles Trail. Birds included **Ruddy Treerunners, Wilson's and Black-throated Green Warblers, Golden-browed Chlorophonia, Hairy Woodpecker**, two **Buffy Tuftedcheeks** foraging in a high bromeliad, two **Swallow-tailed Kites**, and **Golden-bellied Flycatcher**. About half of the group caught a ride the rest of the way back and half continued birding on foot. A large black Rove Beetle was along the roadside, and we found **Black-cheeked Warblers, Streak-breasted Treehunter, and Black-faced Solitaire** as we descended the hill. Vernon and Frank saw a **Swallow-tailed Kite** aerially attacking a **Magnificent Frigatebird**, amid a swarm of **White-collared Swifts**.

Following lunch, there was some down time, but Frank and others did some birding around the hotel. New species seen included **Stripe-tailed Hummingbird, Brown-capped Vireo, Common Bush-Tanager, Gray-breasted Wood-Wren**, and a **Silver-throated Tanager** that kept attacking its reflection in the glass windows. We regrouped mid-afternoon to bird the forest edge nearby which yielded **Emerald Toucanet, Yellowish and Tufted Flycatchers, Collared Redstart, Dark Pewee, and Flame-throated Warbler**. Birding down the road, we then entered the Catarata Trail to the

Waterfall along the Savegre River. Though quieter than normal, we saw several more **Black-cheeked Warblers**.

At 5 PM, Vernon took those that wanted to do some night birding by van. At our first stop, we were successful in hearing and seeing a **Costa Rican Pygmy-Owl** in the flashlight beam. Photos were attempted. A great start! Further along, we listened for a couple other owl species, with no luck. It was a breezy night, as well as bright from the near-full moon; not the best owling conditions. But we did hear at least two **Dusky Nightjars**. Dinner with the group was superb.

Day 6 - Savegre - Cerro de la Muerte - Paraiso Quetzales

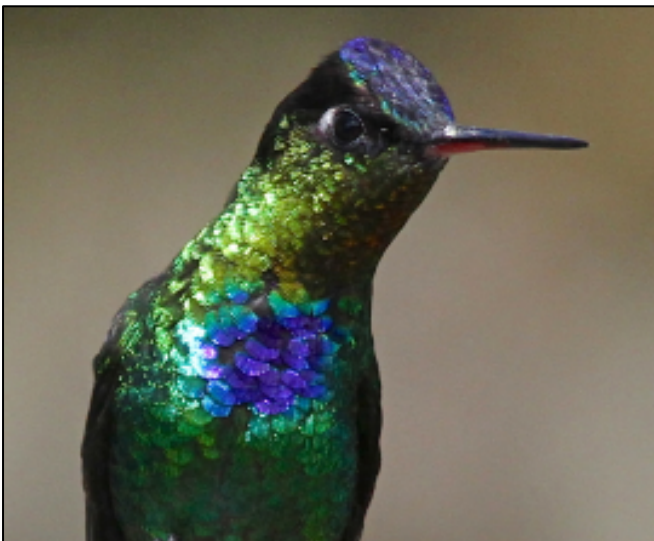

A pre-breakfast walk led by Vernon scored with a **Buff-fronted Quail Dove**, **Chestnut-capped Brush-Finch**, **Ochraceous Wren**, **Louisiana Waterthrush**, and **Yellow-bellied Siskins**. After breakfast, we viewed another male **Resplendent Quetzal**, as well as **Emerald Toucanet**, **Long-tailed Silky Flycatcher**, and **Sulphur-winged Parakeets**.

Then we traveled by van to look for special, high-altitude species at the 12,000-ft Cerro de la

Muerte. We lucked out with a clear, calm morning. A **Ruddy Pigeon** was along the road. En route, Vernon performed his magic and showed us two skulking **Timberline Wrens**. Then we saw a female **Peg-billed Finch** among a flock of other birds in the stunted bamboo and shrubs of this Paramo habitat. Near the summit, we saw at least three **Volcano Juncos**. The view from here, looking down at the clouds below, was

quite memorable. Back along the Highway, Vernon stopped and found for us another skulker, the **Wrenthrush**. Great views!

We then visited another site, Paraiso Quetzales, where we enjoyed several **Fiery-throated Hummingbirds** among other species visiting feeders, before having a family-style lunch. Then we walked the hilly trails and road, with success in seeing a pair of **Black-and-Yellow Silky Flycatchers** feeding on berries. Heading back "home", we stopped at Miriam's for birding and hot coffee/cocoa during the rainy afternoon.

Day 7 - Savegre - San Jose

We met for early coffee on the hotel deck, and enjoyed many of the usual bird species. Following early breakfast, we birded the hotel grounds one last time. A large flock of **Barred Parakeets** flew high overhead. We then birded a nearby forest trail, with the highlights being a covey of **Spotted Wood-Quail**, **Silvery-fronted Tapaculo** (about the best views possible of this mouse-like bird), **Spotted Barbtail**, **Barred Becard** (heard), **Philadelphia Vireo**, **Black-capped Flycatcher**, and stunning views of feeding **Spangle-cheeked Tanagers** and a male **Scintillant Hummingbird**. Malcolm and Frank lingered near the trailhead and were rewarded with great views of the **Buff-fronted Quail-Dove** as it foraged on the ground.

We packed up, loaded the van, had lunch, and checked out of the fabulous Hotel Savegre. We drove back to San Jose to meet departing flights. All agreed it was a great group and a fabulous trip. The only thing wrong was that it was too short. Farewells and thank-you's ended the tour. Most participants spent tonight in San Jose, catching flights home the next morning.

COSTA RICA

Quetzal/Hummingbird Special!

SPECIES LIST

February 9-15, 2014

Leader: Frank Mantlik and local guides (RE = Regional Endemic)

Column: A= Number of species recorded on tour

D = Number of days out of 7 recorded.

F = Highest daily count (H = Heard)

A	SPECIES	Scientific Name	D	F
1	Great Tinamou	<i>Tinamus major</i>	1	1
2	Muscovy Duck	<i>Cairina moscata</i>	2	4
3	Blue-winged Teal	<i>Anas discors</i>	3	40
4	Ring-necked Duck	<i>Aythya collaris</i>	1	1
5	Lesser Scaup	<i>Aythya affinis</i>	2	35
6	Gray-headed Chachalaca	<i>Ortalis cinereiceps</i>	3	4
7	Crested Guan	<i>Penelope purpurascens</i>	2	2
8	Spotted Wood-Quail	<i>Odontophorus guttatus</i>	1	5
9	Least Grebe	<i>Tachybaptus dominicus</i>	1	1
10	Pied-billed Grebe	<i>Podilymbus podiceps</i>	1	1
11	Great Blue Heron	<i>Ardea herodias herodias [cinerea]</i>	1	1
12	Great Egret	<i>Egretta alba</i>	2	5
13	Snowy Egret	<i>Egretta thula</i>	3	4
14	Little Blue Heron	<i>Egretta caerulea</i>	3	2
15	Cattle Egret	<i>Bubulcus ibis</i>	5	30
16	Green Heron	<i>Butorides virescens</i>	1	2
17	Green Ibis	<i>Mesembrinibis cayennensis</i>	2	1
18	Black Vulture	<i>Coragyps atratus</i>	7	300
19	Turkey Vulture	<i>Cathartes aura</i>	7	25
20	White-tailed Kite	<i>Elanus leucurus</i>	2	2
21	Swallow-tailed Kite	<i>Elanoides forficatus</i>	2	2
22	Bicolored Hawk	<i>Accipiter bicolor</i>	1	1
23	Roadside Hawk	<i>Rupornis magnirostris</i>	2	2
24	Broad-winged Hawk	<i>Buteo platypterus</i>	2	1
25	Short-tailed Hawk	<i>Buteo brachyurus</i>	1	1
26	Red-tailed Hawk	<i>Buteo jamaicensis</i>	3	2
27	Sunbittern	<i>Eurypyga helias</i>	1	2
28	White-throated Crake	<i>Laterallus albigularis</i>	1	2
29	Sora	<i>Porzana carolina</i>	1	1
