- Fabulous lodging and meals

### **Day 1 – Arrival San Pedro Sula – Pico Bonito**

Today was a travel day with most people arriving on their flights to San Pedro Sula by mid-afternoon. The 2.5 hour van ride to Pico Bonito Lodge took us through extensive palm-oil plantations. Among the birds seen along the way were **Roadside Hawks**, **White-fronted Parrot**, **Cattle Egrets**, and **Black-necked Stilt**. In early evening, the group met for orientation and a scrumptious dinner.

### **Day 2 – Pico Bonito Lodge**

After an early breakfast our local guide, Jose, led us on a morning walk in the Lodge gardens which are frequented by **Central American Agoutis**, a large member of the rodent family. Birds seen were **Yellow-crowned Night-Heron**, **Collared Aracari**, **Melodious Blackbird** (on nest), **Brown Jays**, **Wood Thrush**, **Ovenbird**, **Summer Tanager**, **Vaux's Swifts**, and a massive sleeping **Great Potoo**. Atop the "Toucan Tower" observation platform overlooking the Rio Coloradito and upwards at the mountains, Jose located our first **Lovely Cotinga** - a spectacularly colorful bird - in a sunlit treetop. Also seen were **Green Honeycreeper**, **Masked Tityra**, **Black Phoebe**, and **Brown-hooded** and **White-crowned Parrots**. Further along, we observed a flock of six **Lovely Cotingas** feeding on the fruit of an avocado tree. Steve photographed

them and also a **White-throated Robin**. Nearby were a cooperative **Blue-crowned Motmot**, two **Gartered Trogons**, **Red-billed Pigeons**, and our first **Keel-billed Toucan**. Also enjoyed were two **Squirrel Cuckoos**, **Black-headed Trogon**, **Long-billed Hermit**, and **White-eyed** and **Philadelphia Vireos**. Up to four **Little Tinamous** called from near the trail, but these secretive forest birds would not be seen. We took a break from the mid-day heat and humidity.

During and after a fabulous lunch, we enjoyed the many feeder and garden birds including **Social Flycatchers**, **Great Kiskadees**, **White-necked Jacobin**, and **Stripe-throated Hermit**, as well as **Variiegated Squirrels**. We met two women guests, one of which had won a holiday here with a winning photograph in *Audubon*. Jose then found for us a diurnal **Ferruginous Pygmy-Owl** (Photo: Frank Mantlik), which was calling as well as photogenic.

A pair of **Vermiculated Screech-Owls** were roosting behind Frank's cabin providing a treat and an amazing **Helmeted Basilisk Lizard** clung to a tree trunk for extended views. During our afternoon walk, we saw **Golden-hooded Tanagers**, **Olive-backed Euphonias**, **Golden-fronted** and **Black-cheeked Woodpeckers**, a pair of **Brown-crested Flycatchers**, and large flocks of soaring **White-collared Swifts**. Under clear skies, we had a fabulous view of the nearby mountains, including 8,000-foot Pico Bonito itself. By a small pool, we patiently enjoyed the bathing behavior by several **Kentucky** and **Hooded Warblers**. A variety of captive reptiles were studied at the Serpentarium. Dinner was followed by Frank reviewing the day's sightings and tomorrow's plans.

### Day 3 – Cuero y Salado Refuge / Pico Bonito National Park

Today we took a morning excursion by van and then small-gauge train, to the Cuero y Salado Wildlife Refuge. Along the way we saw **Yellow-winged Tanager**, **Groove-billed Anis**, **White Ibis**, **Ruddy Ground-Doves**, **Bronzed Cowbird**, and had fantastic views of a beautiful **Turquoise-browed Motmot**. Train stops netted **Bat Falcon**, **Roadside Hawk**, **Crested Caracara**, **Purple Gallinules**, **Northern Jacanas**, **Northern Waterthrush**, and **White-collared Seedeaters**. After registering at the Park office, two skiffs took us on an enjoyable boat ride through the mangrove forests of the Rio Salado. Noteworthy birds seen included **Common Black-Hawks**, **Lesser Yellow-headed Vulture**, **Tricolored**, **Boat-billed**, and **Agami Herons** (thanks, Jamie!), **Anhinga**, **Scaled Pigeon**, **Lesser Nighthawk**, **Ringed**, **Belted**, and **Green Kingfishers**, and a roosting **Northern Potoo**. Frank whistled to the latter, causing the Potoo to rotate its head ever so slowly. Of particular note was an odd-looking **Prothonotary Warbler** exhibiting a rusty-red cap; Steve obtained photos. Other animal highlights were family groups of **Mantled Howler Monkeys**, a group of **Long-nosed Bats** roosting on a tree trunk, a **West Indian Manatee**, a 13-foot **American Crocodile**, and numerous flashy **Blue Morpho** butterflies. After a picnic of cold fresh fruit, we spied a male **American Redstart** and two **Orchard Orioles**. Some walked to a nearby Caribbean beach, where a **Blue-black Grassquit**, a **Whimbrel** and **Brown Pelicans** were seen.

After a delightful lunch that included shrimp ceviche, some down time allowed us to explore the Lodge grounds, or to simply relax. Frank and Steve looked unsuccessfully for the Margay cat that had been around, but did have great views of two **Masked Tityras** (Photo: Frank Mantlik). Meanwhile Jamie had good birds and butterflies near the butterfly garden. Jose then led us on the forest loop trail, with much success: **Red-capped** and **White-collared Manakins**, a pair of **Black-throated Trogons** near a probable nest tree, **White-shouldered Tanager**, **Rufous Mourner**, **White-bellied Emerald**, and a group of eight **Keel-billed Toucans**. In addition we heard the earthy calls of **Keel-billed** and **Tody Motmots**, **Slaty-breasted Tinamou**, and an **Ivory-billed Woodcreeper**.

#### Day 4 – Rio Aguan Valley

About half of the group got an early 4 am start for the long drive south around the coastal mountains to the tropical dry forest of the Rio Aguan Valley. Our quest was for the endangered **Honduran Emerald** hummingbird, the only endemic species in Honduras. During a picnic breakfast in Olanchito, we saw **Purple Martins**, **Mangrove Swallows**, **White-winged Doves**, and **Yellow Warbler**. In the center of town, statues of the endemic Honduran Emerald and Spiny-tailed Iguana mark the significance of the remaining tropical dry forest habitat of the region. Upon arriving at a special reserve, we walked into the thorn-forest, accompanied by a pair of burros. We saw many different species in this unique habitat, including **Lesser Roadrunner**, **Ferruginous Pygmy-Owl**, **Common Ground-Dove**, **White-lored Gnatcatcher**, **White-bellied Wren**, **Long-billed Starthroat**, and **Salvin's Emerald**.

Having seen several males and females zip by, eventually we had stunning and extensive views of a male **Honduran Emerald** (Photo: Frank Mantlik), feeding on its favored species of pencil cactus. Following a lunch of local fare, we returned to Pico in late afternoon. Those who stayed at the lodge experienced a day of rain. Even so, they enjoyed birding and photographing. Gail got great photos of an immature **Ornate Hawk-Eagle** (initially identified as a Black-and-White Hawk-Eagle) in a tree over her head and mobbed by many Oropendolas.

#### Day 5 – Lancetilla Botanical Garden – Rio Santiago

After an early breakfast, we drove to the Lancetilla Botanical Garden. A pause in the rain showers allowed us to walk the entrance road. It was quite birdy, as we saw **Passerini's Tanagers**, **Gray Catbird**, **White-collared Seedeaters**, **Bat Falcon**, and heard a **Gray Hawk**. An alarm call caused us to look up, only to see a **Collared Forest-Falcon** with its freshly caught prey (**Gray-chested Dove**) flying close by us. Further along, we marveled at the dynamics of a large nest colony of **Montezuma Oropendolas**. At the visitor center, Frank spotted two **Lesser Swallow-tailed Swifts**, and we also had **Boat-billed Flycatcher**, **Buff-throated Saltator**, **Thick-billed Seed-**

**Finch**, and **Streak-headed Woodcreeper**. Just after Gail found a pair of **Chestnut-colored Woodpeckers**, the heavier rains resumed, and we aborted further birding.

We had a fabulous outdoor seafood lunch at a nearby restaurant on the Caribbean coast, while watching the stormy surf. Here we saw a variety of shorebirds, gulls, swallows, **Brown Pelicans**, and several **Royal Terns**. During the return drive, Jamie spotted 4 **Wood Storks** along the road, where we also had a **Roseate Spoonbill** and 2 **Neotropic Cormorants**. Still raining, the road along the raging Rio Santiago brought us to a fabulous place for hummingbirds. Under shelter we studied eleven species of 100+ hummingbirds, including **Band-tailed Barbthroat**, **Scaly-breasted Hummingbird** and the fantastic **Violet Sabrewing**. Back at the Lodge, manager James treated us to a wonderful digital photo presentation of the wildlife of Pico Bonito. Our last dinner together included many delicious entrees.

### **Day 6 – Pico Bonito – San Pedro Sula**

Breakfast was followed by a last view of the feeder and garden birds, checkout, farewells, and van ride back to San Pedro Sula airport. All agreed it was a fabulous short getaway to the Neotropic. We'll be back!

Many thanks to all of the participants for joining us and for making this tour a very successful and enjoyable experience. We hope to see you on another Sunrise Birding tour!

Respectfully submitted,  
Frank Mantlik
