COSTA RICA TRIP REPORT

January 30 – February 5, 2020

Leaders: Frank Mantlik & Vernon Campos

Report and photos by Frank Mantlik

Highlights and top sightings of the trip as voted by participants

- Resplendent Quetzals, multi
- Spectacled Owl
- Bare-shanked Screech Owl
- Black-and-white Owl
- Suzy the “owling” dog
- Keel-billed Toucan
- Tayra!!!
- Black-faced Solitaire (& song)
- Amazing flora, fauna, & trails
- Sunbittern
- Wayne’s insect show-and-tell
- Spangle-cheeked Tanager
- Rancho Naturalista
- Golden-hooded Tanager
- Vernon as guide and driver
- 20 species of hummingbirds
- 2 CR & 32 Regional Endemics
- 4 species Owls seen in 70 minutes
- Russet-naped Wood-Rail
- Great Potoo
- Long-tailed Silky-Flycatcher
- Rufous-browed Peppershrike
- American Pygmy Kingfisher
- Orange-billed Sparrow
- Volcano Hummingbird
- Purple-crowned Fairy, bathing
- Turquoise-browed Motmot
- White-nosed Coati

January 29 - Arrival San Jose

All participants arrived a day early, staying at Hotel Bougainvillea. Those who arrived in daylight had time to explore the phenomenal gardens, despite a rain storm.

Day 1 - January 30

Optional day-trip to Carara National Park

Guides Vernon and Frank offered an optional day trip to Carara National Park before the tour officially began and all tour participants took advantage of this special opportunity. As such, we are including the sightings from this day trip in the overall tour report.

We departed the Hotel at 05:40 for the drive to the National Park. En route we stopped along the road to view a beautiful **Turquoise-browed Motmot**. Also present were Inca and Common Ground Doves, Melodious Blackbirds, and a Yellow-headed Caracara flew over us. A rest stop yielded a Gray-breasted Martin, White-winged Doves, and a flock of Groove-billed Anis.

We arrived at Carara NP at opening time. Just around the parking lot we saw **Rufous-naped Wren** (nest-building), Rose-throated Becard, Boat-billed Flycatcher, Blue-vented Hummingbird, and several Scarlet Macaws flew over. An ant swarm nearby attracted 4 Lesson's Motmots, 2 Gray-headed Tanagers, Tawny-winged Woodcreeper, Barred Antshrike, and Wood Thrush. We then birded the forest trails for several hours. We saw lots of great birds, highlighted by Slaty-tailed, Black-throated, and Baird's Trogons, Rufous-tailed Jacamar, Blue-throated Goldentail, Squirrel Cuckoo, Black-hooded

Antshrike, Chestnut-backed Antbird, Plain Xenops, Long-billed Gnatwren, Ruddy-tailed Flycatcher, Crested Guans, and White-shouldered Tanagers. Mammals seen included Central American Agouti, Collared Peccary, White-faced Capuchin, Spider Monkey, and White-lined Bat. Upon our return, Green Urania moths flitted over the lot.

After a delightful lunch and refreshing beverages at a nearby restaurant, we drove a side road near Tarcoles. Brown Pelicans and Magnificent Frigatebirds soared along the blue Pacific Ocean. A small wetland in the forest was teeming with birds - Wood Storks, a variety of herons and egrets, 2 Bare-throated Tiger-Herons, and three species of Kingfishers (Ringed, Green, and American Pygmy). A local birder then led us to wonderful views of four species of roosting owls: Ferruginous Pygmy, Pacific Screech, Black-and-white, and Spectacled! This was an amazing experience! Continuing on, incidental sightings included White Ibis, Common Black Hawk, Gray Hawk, Short-tailed Hawk, and Crested Caracara (atop a city cell tower).

Upon return to the Hotel, the tour, as advertised, officially began. Frank welcomed all to Costa Rica and thanked them for choosing Sunrise Birding.

Day 2 - January 31 - San Jose to Talamanca Mountains/Savegre River Valley

Vernon and Frank led a pre-breakfast walk across the street from the hotel. The highlight was good views of Cabanis's Ground-Sparrow, a recent species split that resulted in a Costa Rican endemic. Also seen were Rufous-tailed Hummingbird, Red-billed Pigeon, Hoffmann's Woodpecker, Social Flycatcher, Tropical Kingbird, Cabanis's Wren, Rufous-capped Warbler, and Bronzed Cowbird. Some also explored the hotel gardens. During our incredible breakfast, we were entertained by Clay-colored Thrushes at the fruit feeder. We loaded the van and departed for the Talamanca Mountains.

We arrived at Paraiso Quetzales Lodge to view and photograph the many hummingbirds swarming the feeders. Great views were had of Lesser Violetears and **Fiery-throated**, Talamanca, and Volcano Hummingbirds. Cameras clicked and videos whirred. Also seen were Blue-and-white Swallows, White-collared Swifts, Golden-browed Chlorophonia, and our first Long-tailed Silky-flycatchers. We were then served a hearty lunch.

Next we briefly birded nearby Providencia Road, where we observed Mountain Elaenia, Black-capped Flycatcher, Sooty-capped Chlorospingus, Wilson's Warbler, and a pair of Black-and-yellow Phainoptila (Silky-flycatchers). Proceeding downhill to the village of San Gerardo de Dota, the next stop was Miriam's Cafe, where feeders attract birds and squirrels to the rear balcony. Great looks were had of White-throated Mountain-gems, Flame-colored Tanagers, Acorn Woodpeckers, Sooty Thrushes, Rufous-collared Sparrows, Slaty Flowerpiercer, Large-footed Finch, and Yellow-thighed Brushfinch.

Continuing our descent to the Savegre River Valley, we stopped along the road where Vernon miraculously spotted a pair of Resplendent Quetzals, a major target species of the tour. The regal male perched on the same branch for over a half hour, with its female nearby. Cameras and scopes were trained on them. Additional tourists and birders stopped; soon there was an appreciative, excited crowd enjoying these magnificent birds. We arrived at our lodge, Suenos del Bosque, and settled in before dinner and reviewing the day's list.

Day 3 - February 1 - Savegre Area and Cerro Buenavista

At dawn we took a short birding walk on the lodge grounds. The cool mountain air seemed to cause much bird activity. New trip species included two Black Guans, Scintillant and Stripe-tailed Hummingbirds, Collared Trogon, Yellowish Flycatcher, Yellow-winged Vireo, Collared Redstart (Whitestart), and Spangle-cheeked and Silver-throated Tanagers. A Black-faced Solitaire was catching insects on the ground along the driveway. Hot coffee and breakfast were welcomed. Afterward we birded on foot on trails to an adjacent lodge with wonderful gardens. We

We saw Ruddy-capped Nightingale-Thrush, Spot-crowned Woodcreeper, Sulphur-winged Parakeets, the local race of Red-tailed Hawk, Northern Emerald-Toucanet, Mistletoe Tyrannulet, and a pair of Yellow-bellied Siskins. At their feeders we had great views of five species of hummingbirds, Blue-gray Tanagers, several Baltimore Orioles, and at least seven Tennessee Warblers. The ubiquitous Rufous-collared Sparrows were in full song.

We continued our walk along the road adjacent to the Savegre River, where we saw Dark Pewee, Louisiana Waterthrush, Yellow-winged and Philadelphia Vireos, many Black Vultures, and point-blank views of a female **Slaty Flowerpiercer** feeding on red flowers. Continuing further on along a trail toward the trout hatchery and cataract, we had good views of Brown-capped Vireo, Yellowish and Olive-striped Flycatchers, two Ochraceous Wrens, Golden-winged Warbler, and two Flame-throated Warblers. A pair of Resplendent Quetzals was in a tree right over one of our rooms! We then hiked some of the forest trails near the lodge, including along a

suspension bridge. We heard a Silvery-fronted Tapaculo, and encountered a mixed foraging flock that included Ruddy Treerunner, Hairy Woodpecker, Black-cheeked Warbler, and several tanagers. At lunch, the choices included trout, chicken, beef, pasta, and many sides and salads.

After some down time, we reconvened to ride the van along the Pan-American Highway and up a side road to Cerro Buenavista. This mountain (elev. 11,300 ft) is above timberline and above the clouds. The habitat is called Paramo, with dense, stunted vegetation that includes a native species of bamboo. We worked to find special target birds here, and were successful in seeing Volcano Junco, Peg-billed Finch, and Timberline Wren, as well as several Volcano Hummingbirds. Incidentally, a Good Samaritan with a 4WD vehicle was actively towing two vehicles that had driven down a steep slope. While driving back to the highway, a large Coyote appeared in the road.

Back in the Savegre valley, we stopped briefly along a side road. Robert stayed in the van, and was the lucky one to see a sleek Jaguarundi run across the road! We again stopped at Miriam's for hot coffee and cocoa. Mountain and Sooty Thrushes and Red-tailed Squirrels joined the many **Flame-colored Tanagers** and Talamanca Hummingbirds. As the sun set and darkness fell, we got in position to hear the nocturnal calls of several Dusky Nightjars. Vernon persisted and spotted one perched in a tree. All got terrific scope views; Morgan managed a decent photo.

Day 4 - February 2 - Savegre Area

Among the species seen during a pre-breakfast walk were a covey of Spotted Wood-Quail, a Chestnut-capped Brushfinch, and a Gray-breasted Wood-Wren. After breakfast, we rode 4-wheel-drive vehicles up the road behind Hotel Savegre. The forest here was magnificent with huge trees covered with mosses, epiphytes, and bromeliads. We birded back down the mountain via the Los Robles trail. Highlights included views of Golden-olive Woodpecker (in nest cavity), Buffy Tuftedcheek, Tufted Flycatcher, Black-billed Nightingale-Thrush, and multiple Ruddy Treerunners. But by far, the most amazing find was a roosting Bare-shanked Screech Owl, a bird that Vernon miraculously found after an hour of diligent searching.

Continuing down along the Jeep road, we had fabulous views of a feeding **Black Guan**, a Mountain Elaenia, a flock of Sooty-capped Chlorospingus, and a Yellowish Flycatcher feeding its chicks in a nest made in the moss of a tree trunk.

After lunch at Suenos Lodge, we re-grouped in the lodge lot. Here we had our best looks at a large flock of Band-tailed

Pigeons atop a nearby tree. Also a pair of Long-tailed Silky-flycatchers appeared to be nest-building, while a female Scintillant Hummingbird fed on flowers. We then hiked some different forest trails, seeing a nice variety of birds, including a pair of Ruddy-capped Nightingale-Thrushes, Collared Whitestarts, two Buffy Tuftedcheeks, Yellow-thighed Brushfinch, and terrific scope views of a male Resplendent Quetzal! Farther on along an upper trail, we looked down on a very close (same?) male Quetzal, but it flew as we got into position for photos. At the footbridge, a male Summer Tanager appeared.

At day's end we gathered at the bar/restaurant to watch the Superbowl. Kansas City came from behind in the fourth quarter to win an exciting game against San Francisco, 31-20.

Day 5 - February 3 - Savegre to Rancho

This would be a travel morning, but not before some casual pre-breakfast birding at Suenos Lodge. We saw a few of our “old friends” such as **Long-tailed Silky-flycatcher**, Mountain Elaenia, Flame-colored Tanager, and Scintillant Hummingbird. After breakfast we checked out and departed, making a brief but productive stop along the road out. Highlights were four Flame-throated Warblers, Black-and-white Warbler, and a singing Rufous-browed Peppershrike. After a fuel stop, we visited a park in the Paraiso section of Cartago. With guide Vernon we hit the jackpot, seeing some Crimson-fronted (Finsch’s) Parakeets as well as two roosting Barn Owls and two cozy Tropical Screech-Owls.

We arrived at Rancho Naturalista Ecolodge in time for lunch. The delightful open-air dining room has a view of the gardens and feeders. Fine food was coupled with great birding! The avian show included Gray-headed Chachalacas, Brown Jays, Red-billed Pigeons, Montezuma Oropendolas,

Tennessee Warbler, Blue-gray Tanager, and Yellow-faced Grassquits. Ascending to the balcony, we enjoyed the company of many colorful winged-jewels including Rufous-tailed Hummingbird, White-necked Jacobin, **Crowned Woodnymph**, Green-breasted Mango, and Violet Sabrewing. An Olive-backed Euphonia and a Buff-throated Saltator came to eat banana, a White-tipped Dove fed on the ground, while a stunning Scarlet-rumped Tanager and a pair of White-lined Tanagers visited, and a Roadside Hawk flew overhead. A White-nosed Coati appeared on the platform feeder, chasing away a number of Variegated Squirrels.

A walk down the driveway resulted in excited views of stunningly-colored Golden-hooded and Bay-headed Tanagers, Green Honeycreeper, Blackburnian Warbler, and Green Thorntail...all in one tree. We had good views of a flock of Chestnut-headed Oropendolas, but a flyby Keel-billed Toucan offered only a glimpse.

We took a late afternoon walk down to a forest stream, and waited for the show to begin. No, it wasn’t a drive-in movie, but an avian show of hummingbirds and others coming in to bathe and drink at day’s end. Our flashlights illuminated bathing Crowned Woodnymphs, female Snowcaps, and a stunning Purple-crowned Fairy. Other birds that visited included Orange-billed Sparrow, Buff-throated Foliage-gleaner, White-ruffed Manakin, Wood Thrush, Rufous-capped and Kentucky Warblers, and Carmiol’s Tanager. Flycatchers included Sulphur-rumped, Ochre-bellied, Slaty-capped, and Yellow-bellied. After dinner, we reviewed the long

list of birds seen today. Frank, working on his computer afterwards, was stunned when a birder friend from CT, and his wife, walked into the den.

Day 6 - February 4 - Rancho, San Antonio, CATIE

We started the day with a cup of fine local coffee, and then walked at dawn to the nearby lighted sheet to see what birds might be attracted to the insects. Close views were had of some forest birds such as Red-throated Ant-Tanager, Plain-brown and Spotted Woodcreepers, White-breasted Wood-Wren, Dusky-capped and Tawny-chested Flycatchers, Buff-throated Foliage-gleaner, and the striking Orange-billed Sparrow. Returning to the lodge, Frank and a few others found a mixed feeding flock that included White-vented Euphonia, Speckled Tanager, and a female Scarlet-thighed Dacnis, as well as a perched Collared Aracari.

After breakfast, we departed to San Antonio/Plantanillo to bird a side road that leads to Silence Mountain. The first stop was a check of the river that produced a pair of much-desired Sunbitterns, as well as Torrent Tyrannulet. Further up the road we had glimpses of a Bay Wren, and good views of a Blackburnian Warbler. Birding was quieter than normal here, but we still managed to see Yellow-olive Flycatcher, Yellow-bellied Elaenia, Mistletoe Tyrannulet, Black Phoebe, Southern Rough-winged Swallows, Silver-throated and Black-and-yellow Tanagers, Bananaquit, and several Snowcaps and Buff-rumped Warblers. We tried another spot, La Mina, and found a flurry of activity along the river. Sandra spotted a **Russet-naped Wood-Rail** along the bank, a highlight. Plus we saw Tropical Pewee, Common Tody-Flycatchers,

Yellow-throated Vireo, Black-cheeked Woodpeckers, Mourning Warbler, Blue-black Grassquits, Grayish Saltator, Crested Caracara, and five species of Tanagers including White-lined, Palm, and Golden-hooded.

After lunch at Rancho, there was some down time, though many continued to enjoy and photograph the varied hummingbirds, doves, warblers, and other wildlife around the lodge. A sleek black and powerful **Tayra** (a large member of the weasel family) appeared several times to raid the bananas. A mid-afternoon van ride to nearby CATIE

produced a number of new bird species including many water birds. The lake yielded Cattle Egrets, Anhinga, Green and Boat-billed Herons, Yellow-crowned Night-Heron, Northern Jacanas (with juveniles), Purple Gallinules, and Green Ibis. A walk of the campus roads netted us nice scope views of Roadside Hawk and White-crowned Parrots; Montezuma Oropendolas flew into their nesting colony. At the Jardin Botanical Area we found a flock that included Black-crested Coquette, Tropical Gnatcatcher, and Tropical Parula. But the highlight was seeing a sleeping **Great Potoo!** The return drive yielded a fly-by Bat Falcon, seen by some. It was yet another very productive day!

Day 7 - February 5 - Rancho to San Jose

This final morning we gathered for predawn coffee (some heard a Common Potoo) before walking to a nearby naturalist's private yard. We viewed the birds that came to the edge of the forest to inspect

his moth sheet. Good looks were had at **Rufous Motmot**, Cocoa and Plain-brown Woodcreepers, Green Hermit, Eye-ringed Flatbill, and Mourning Warbler. Wayne then displayed some amazing large live moths, a Hercules beetle, and a large Katydid. He also showed us other mounted insect specimens, as well as a fallen Oropendola nest, which has since served as a nest site for a pair of Olive-backed Euphonias. His botanical collection included a variety of banana and Bird-of-Paradise plants. Thanks Wayne! While returning to the lodge, we spotted a Crimson-collared Tanager, a Golden-crowned Warbler, and a Violet-headed Hummingbird.

Another delicious breakfast at Rancho was followed by checking out. But first, one last view from the patio yielded great views of Squirrel Cuckoo, Collared Aracaris, Keel-billed Toucans, a Gartered Trogon, a Masked Tityra, and flocks of White-crowned Parrots and Crimson-fronted (Finsch's) Parakeets. We bade farewell to our hosts and hit the road for San Jose. En route we made a brief stop at Birris Reservoir, adding a few species to the trip list: Blue-winged Teal, Lesser Scaup, Southern Lapwing, and Northern Rough-winged Swallow. On the bus, Frank wrote down each person's trip highlights. Without encountering traffic delays, we returned to San Jose, dropping some off at the Airport for flights home, and others to their nearby hotels for one more night in Costa Rica. Farewells and fond memories capped off a terrific week of birding this scenic and friendly country.

Many thanks to Vernon, who served as both our very capable local bird expert and terrific driver. And thanks especially to all the participants for choosing Sunrise Birding. It was truly a joy meeting you, and sharing Costa Rica's natural riches with you. We hope to see you on another Sunrise Birding tour sometime soon.

Sincerely,
Frank Mantlik
Sunrise Birding Guide

Sunrise Birding LLC

COSTA RICA SPECIES LIST

January 30 – February 5, 2020

#	SPECIES	Scientific Name	Heard only (H)	Comments
1	Great Tinamou Nt	<i>Tinamus major</i>	H	Two singles heard at Carara 1/30
2	Blue-winged Teal	<i>Spatula discors</i>		About 110 on Birris Reservoir 2/5
3	Lesser Scaup	<i>Aythya affinis</i>		35 on Birris Reservoir 2/5
4	Grey-headed Chachalaca	<i>Ortalis cinereiceps</i>		Up to 12 seen daily at Rancho Naturalista
5	Crested Guan	<i>Penelope purpurascens</i>		2 seen at Carara 1/30. 1 seen by some 2/4
6	Black Guan Nt	<i>Chamaepetes unicolor</i>		4 seen near Savegre 2/1, and 1 on 2/2
7	Spotted Wood Quail	<i>Odontophorus guttatus</i>		4 or more seen two days near Savegre
8	Wood Stork	<i>Mycteria americana</i>		About 30 at small wetland, Tarcoles road
9	Green Ibis	<i>Mesembrinibis cayennensis</i>		One at CATIE lawn 2/4
10	American White Ibis	<i>Eudocimus albus</i>		flock of 17 along Tarcoles road 1/30
11	Bare-throated Tiger Heron	<i>Tigrisoma mexicanum</i>		Adult & immature at small wetland, Tarcoles
12	Boat-billed Heron	<i>Cochlearius cochlearius</i>		At least 2 at CATIE pond-edge 2/4
13	Yellow-crowned Night-Heron	<i>Nyctanassa violacea</i>		2 at CATIE pond-edge 2/4
14	Green Heron	<i>Butorides virescens</i>		2 at Tarcoles 1/30; 2 at CATIE 2/4
15	Western Cattle Egret	<i>Bubulcus ibis</i>		Up to 50 seen various places, 4 days
16	Great Blue Heron	<i>Ardea herodias</i>		Two seen 1/30 near Carara, Tarcoles

17	Great Egret	<i>Ardea alba</i>		15 at Tarcoles; 2 singles near Rancho
18	Little Blue Heron	<i>Egretta caerulea</i>		Immatures at Tarcoles 1/30, La Suiza 2/4
19	Snowy Egret	<i>Egretta thula</i>		1 at Tarcoles pool 1/30
20	Brown Pelican	<i>Pelecanus occidentalis</i>		10 or so along Pacific coast near Tarcoles
21	Magnificent Frigatebird	<i>Fregata magnificens</i>		20+ in flight along Pacific coast near Tarcoles
22	Turkey Vulture	<i>Cathartes aura</i>		Numerous; many seen daily
23	Black Vulture	<i>Coragyps atratus</i>		Numerous; many seen daily
24	White-tailed Kite	<i>Elanus leucurus</i>		1 seen by some at Bougainvillea 1/31; others?
25	Sharp-shinned Hawk	<i>Accipiter striatus</i>		1 seen by some in flight at Rancho 2/4
26	Common Black Hawk	<i>Buteogallus anthracinus</i>		1 seen well perched at Tarcoles 1/30
27	Roadside Hawk	<i>Rupornis magnirostris</i>		1 flyover Rancho 2/3; perched bird at CATIE 2/4
28	Grey Hawk	<i>Buteo plagiatus</i>		1 soaring Tarcoles 1/30; 1 Birris Reservoir
29	Short-tailed Hawk	<i>Buteo brachyurus</i>		1 soaring along hwy NE of Carara
30	Red-tailed Hawk	<i>Buteo jamaicensis costaricensis</i>		Local subspecies seen 2 days near Savegre
31	Sunbittern	<i>Eurypyga helias</i>		Pair seen along river San Antonio 2/4
32	White-throated Crake	<i>Laterallus albigularis</i>	H	1 heard only in marsh at CATIE 2/4
33	Grey-necked (Russet-naped) Wood Rail	<i>Aramides cajaneus</i>		1 seen well along river La Mina 2/4
34	Purple Gallinule	<i>Porphyrio martinica</i>		10 seen at CATIE 2/4
35	Southern Lapwing	<i>Vanellus chilensis</i>		4 at Birris Reservoir 2/5
36	Killdeer	<i>Charadrius vociferus</i>		2 at Cartago 1/31; 1 at Birris 2/5
37	Northern Jacana	<i>Jacana spinosa</i>		10+ at CATIE 2/4

38	Rock Dove I	<i>Columba livia</i>		Several seen four days in various cities
39	Band-tailed Pigeon	<i>Patagioenas fasciata</i>		Up to 15/day, 3 days near Savegre
40	Red-billed Pigeon	<i>Patagioenas flavirostris</i>		Numbers at Hotel Boug and at Rancho
41	Ruddy Pigeon V	<i>Patagioenas subvinacea</i>	H	1 heard only Savegre 2/2
42	Short-billed Pigeon	<i>Patagioenas nigrirostris</i>	H	1 heard only 1/30
43	Inca Dove	<i>Columbina inca</i>		Seen & heard first 2 days - Hotel, Carara
44	Common Ground Dove	<i>Columbina passerina</i>		4 seen near Carara 1/30
45	White-tipped Dove	<i>Leptotila verreauxi</i>		1 seen Carara; singles daily at Rancho
46	White-winged Dove	<i>Zenaida asiatica</i>		Numerous in cities, towns
47	Groove-billed Ani	<i>Crotophaga sulcirostris</i>		10 at gas stop to Carara 1/30; others
48	Squirrel Cuckoo	<i>Piaya cayana</i>		2 at/near Carara 1/30; 1 at Rancho on 2/5
49	American Barn Owl	<i>Tyto furcata</i>		Pair roosting daytime in Paraiso 2/3
50	Pacific Screech Owl	<i>Megascops cooperi</i>		One roosting daytime in Tarcoles 1/30
51	Tropical Screech Owl	<i>Megascops choliba</i>		Pair roosting daytime in Paraiso 2/3
52	Bare-shanked Screech Owl	<i>Megascops clarkii</i>		1 seen well in forest roost above Savegre 2/2
53	Mottled Owl	<i>Strix virgata</i>	H	Heard by some two nights at Rancho
54	Black-and-white Owl	<i>Strix virgata</i>		One roosting daytime in Tarcoles 1/30
55	Spectacled Owl	<i>Pulsatrix perspicillata</i>		One roosting daytime in Tarcoles 1/30
56	Ferruginous Pygmy Owl	<i>Glaucidium brasilianum</i>		One roosting daytime in Tarcoles 1/30
57	Great Potoo	<i>Myctibius grandis</i>		One roosting daytime CATIE 2/4

58	Common Potoo	<i>Nyctibius griseus</i>	H	1 heard pre-dawn at Rancho 2/5
59	Dusky Nightjar R-E	<i>Antrostomus saturatus</i>		1 seen well, 3+ others heard Savegre area 2/1
60	White-collared Swift	<i>Streptoprocne zonaris</i>		20+ racing over Quetzales Lodge 1/31
61	Green Hermit	<i>Phaethornis guy</i>		1 seen each day at Rancho feeders
62	Violet Sabrewing	<i>Campylopterus hemileucurus</i>		1 seen each day at Rancho feeders
63	White-necked Jacobin	<i>Florisuga mellivora</i>		Up to 20/day at Rancho
64	Lesser (Green) Violetear	<i>Colibri cyanotus</i>		10+/day in Talamanca Mts.
65	Green-breasted Mango	<i>Anthracothorax prevostii</i>		Male, female daily at Rancho feeders
66	Violet-headed Hummingbird	<i>Klais guimeti</i>		1 seen well at Rancho hedge/lot 2/5
67	Black-crested Coquette	<i>Lophornis helenae</i>		1 seen briefly at Jardin Garden (CATIE) 2/4
68	Green Thorntail	<i>Discosura conversii</i>		Singles seen 3 days at/near Rancho
69	Fiery-throated Hummingbird R-E	<i>Panterpe insignis</i>		Great views Quetzales Lodge 1/31, etc.
70	Stripe-tailed Hummingbird	<i>Eupherusa eximia</i>		Up to 3/day in Savegre Valley
71	Crowned Woodnymph	<i>Thalurania colombica</i>		10+/day at Rancho & vicinity
72	Blue-throated Sapphire (Goldentail)	<i>Hylocharis eliciae</i>		3 singles seen at Carara 1/30
73	Rufous-tailed Hummingbird	<i>Amazilia tzacatl</i>		Several Hotel Boug and daily at Rancho
74	Blue-vented Hummingbird	<i>Amazilia Hoffmanni</i>		1 seen by all at Carara 1/30
75	White-throated Mountain-gem R-E	<i>Lampornis castaneiventris</i>		Many seen daily Savegre Valley; mostly females
76	Snowcap R-E	<i>Microchera albocoronata</i>		1-3/day at/near Rancho
77	Talamanca Hummingbird	<i>Eugenes spectabilis</i>		Numerous daily in Talamanca Mts.

78	Purple-crowned Fairy	<i>Heliodytes barroti</i>	1 seen bathing stream pools Rancho 2/3
79	Volcano Hummingbird R-E	<i>Selasphorus flammula</i>	Several seen daily in Mts. 1/31-2/2
80	Scintillant Hummingbird R-E	<i>Selasphorus scintilla</i>	Seen well 2-3 days at Suenos/Savegre
81	Resplendent Quetzal Nt	<i>Pharomachrus mocinno</i>	Pairs seen each day Savegre Valley
82	Slaty-tailed Trogon	<i>Trogon massena</i>	1 seen Carara 1/30
83	Baird's Trogon	<i>Trogon bairdii</i>	1 seen Carara 1/30
84	Gartered (Violaceous) Trogon	<i>Trogon caligatus</i>	1 at Carara 1/30; 1 at Rancho last morning 2/5
85	Black-throated Trogon	<i>Trogon Rufus</i>	1 seen at Carara 1/30
86	Collared Trogon	<i>Trogon collaris</i>	Singles seen Suenos/Savegre Feb 1,2
87	Ringed Kingfisher	<i>Megaceryle torquata</i>	1 seen at small wetland, Tarcoles 1/30
88	American Pygmy Kingfisher	<i>Chloroceryle aenea</i>	1 seen at small wetland, Tarcoles 1/30
89	Green Kingfisher	<i>Chloroceryle americana</i>	1 seen at small wetland, Tarcoles 1/30
90	Lesson's (Blue-crowned) Motmot	<i>Momotus lessonii</i>	4 together at Carara; 1 opp Hotel Boug;
91	Rufous Motmot	<i>Baryphthengus martii</i>	1 heard and seen well at Rancho (Wayne's yard)
92	Turquoise-browed Motmot	<i>Eumomota superciliosa</i>	1 seen well on wire en route Carara; a 2nd later
93	Rufous-tailed Jacamar	<i>Galbula ruficauda</i>	Scope views of one at Carara forest 1/30
94	Emerald Toucanet	<i>Aulacorhynchus prasinus</i>	1 seen by a few at Savegre Lodge 2/1
95	Collared Aracari	<i>Pteroglossus torquatus</i>	1-3 seen each day at Rancho
96	Keel-billed Toucan	<i>Ramphastos sulfuratus</i>	Heard and seen at Rancho and El Silencio road
97	Acorn Woodpecker	<i>Melanerpes formicivorus</i>	Common in Savegre Valley, especially at Miriam's

98	Black-cheeked Woodpecker	<i>Melanerpes pucherani</i>		2 seen near La Mina river 2/4
99	Hoffmann's Woodpecker R-E	<i>Melanerpes hoffmannii</i>		Several seen various sites; nest hole Hotel Boug
100	Hairy Woodpecker	<i>Leuconotopicus villosus</i>		Singles seen 3 days Savegre area
101	Golden-olive Woodpecker	<i>Colaptes rubiginosus</i>		Male in nest hole Los Robles trail
102	Lineated Woodpecker	<i>Dryocopus lineatus</i>		1 seen in Carara forest 1/30
103	Northern Crested Caracara	<i>Caracara cheriway</i>		4 singles at various: city cell tower, La Mina, etc.
104	Yellow-headed Caracara	<i>Milvago chimachima</i>		3 on 1/30, including flyover at T-B Motmot
105	Bat Falcon	<i>Falco ruficularis</i>		1 flyby along road return from CATIE 2/4
106	Peregrine Falcon	<i>Falco peregrinus</i>		2 seen 1/30 during Carara trip
107	Brown-hooded Parrot	<i>Pyrilia haematotis</i>		At least 2 at CATIE 2/4
108	White-crowned Parrot	<i>Pionus senilis</i>		Several seen at Rancho & CATIE (scope)
109	Sulphur-winged Parakeet R-E	<i>Pyrrhura hoffmanni</i>		flying flocks two days at Savegre
